PRESS RELEASE

CaoSys Introduces User Provisioning & Access Review Solution for Oracle E-Business Suite

23rd April 2014, CaoSys, a developer of Governance, Risk and Compliance (GRC) software announced this week the introduction CS*Provisum, a new solution to help automate and streamline user provisioning and access review processes for Oracle E-Business Suite.

CS*Provisum essentially consists of two main components, *Automated Assignment Provisioning* (AAP) and *Periodic Access Review* (PAR).

AAP provides self-service capabilities for end-users, supervisors and super users to submit access requests that are fully audited from submission through to approval at which point the provisioning is fully automated. PAR greatly streamlines and improves an organizations periodic access review processes.

Craig O'Neill, CTO at CaoSys said "For most organizations using Oracle E-Business Suite, user provisioning and periodic access review processes are cumbersome, time consuming and difficult to manage, mainly due to the ever changing user base and the access they require; ensuring user provisioning and access reviews are effective in such a way as to not introduce undue risk is very difficult to achieve without some level of software automation. CS*Provisum provides all the tools you need to streamline and automate user provisioning and access reviews whilst ensuring visibility of any potential risks that could be introduced if inappropriate access is granted".

CS*Provisum is embedded into Oracle E-Business Suite with a native look and feel helping make users feel at home when using the solution. It does not require any additional hardware or software and can be installed within an hour and implemented within days.

"CS*Provisum is a fantastic new addition to our suite of solutions, its introduction further demonstrates our continued commitment to the Oracle E-Business Suite platform and it will be a valuable part of any organizations GRC toolkit." continued O'Neill.

CS*Provisum is available from today for Oracle E-Business Suite release 11i and R12.

For more information on CS*Provisum or any of the company's other solutions, visit CaoSys online at www.CaoSys.com.
